Grounding & Bonding Piercing Plates

SN-BP Series

Toothed bonding plates that pierce anodised coatings for reliable equipotential bonding.

Key features

- Serrated teeth pierce anodised and coated surfaces
- Slot and hole layouts for rail, clamp and frame connections
- Round serrated washers and flat bonding plates
- Ten standard profiles, with custom shapes on request
- Simplifies array grounding without separate jumpers

Applications

- Rooftop and ground-mounted racking
- Equipotential bonding of module frames and rails

Specifications

Material	Formed metal sheet, stainless or galvanised steel (confirm per drawing)
Dimensions	Ten standard profiles; dimensions per drawing
Compatibility	Aluminium rails, clamps and module frames
Pack Quantity	Bulk cartons; confirmed with quotation
MOQ	Confirmed per order
Lead time	Confirmed with quotation
Packaging	Bulk cartons

Values marked "to be confirmed" are finalised on the order drawing. Specifications may change without notice. Request the drawing and test reports for your project.
